

NOVALOK

ADVANCING INNOVATION

USER FRIENDLY DESIGN

Perfect for busy healthcare environments

Implant trolleys.

The Novalok Implant trolley is a popular must have in the busy healthcare environment.

Epoxy powdercoated over a zinc passivated coating provides a durable finish to the system plus gives an excellent aesthetic appearance.

CHASSIS

New and improved Novalok chassis. Now can take Novex shelf inserts, acting as a bottom tier. On lighter duty units wheels can be mounted directly to Novalok shelf units, for heavier duty applications, a chassis is used. We recommend anything over 200kg to have a full chassis.

RAILS

30 x 30 x 3 Standard angle rails.

30 x 40 x 30 x 2.5 Heavy Duty Channel rails also available.

Standard lengths available:

800 • 900 • 1000 • 1200 • 1400 • 1500 • 1600 • 1800 • 2000

CASTORS

Top quality castors used only. Standard to supply 2 x brake and 2 x non brake for all Implant trolleys.

FRAMES

Each frame is made up of two posts and horizontal and diagonal braces.

Standard Sizes: 900H • 1200H • 1500H • 1800H • 2100H

Standard Depths: 300D • 450D • 600D

NOVEX

Most popular shelf finish is Novex shelf inserts. 200mm single sections. other shelf options available include: Wire Racking and Solid Panel.

END GRIP HANDLES

When moving trolleys around the simple option is to get end handles and make the job safer and easier on your body. Handles are fitted vertically onto the frame of the trolley.

COVER / SECURITY OPTIONS

Covers can be custom made and logos can be printed. Available in popular Canvas Cover or Clear. For extra security mesh cages can be used.
